

WHERE ARE THEY NOW?

GPEX AGPT Graduates delivering general practice services in SA.

GPEX and the University of Adelaide undertook a research project to understand the regional distribution of GPEX Graduates within SA. It incorporated the personal and professional factors that may influence a graduate's future practice location.

SAMPLE

Phase 1 Graduates

341 (97%)

Phase 2 Graduates

217 (62%)

Graduate Sample Period

2010-2016

RETENTION RATES

84%

of graduates that trained in SA have been retained within the state

39%

Rural retention rate in SA

35%

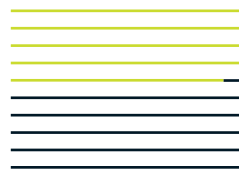

For every 10 week increase in AGPT rural training weeks, graduates are **35%** more likely to practise rurally

30%

of graduates who had completed their 10 year Moratorium chose to stay in rural practice

TRAINING PATHWAYS

49%

of all graduates completed their training on the rural pathway

80%

of all graduates currently working in rural areas trained on the rural pathway

20%

of all graduates currently working in rural areas trained on the general pathway

FACTORS INFLUENCING PRACTICE LOCATION

6x

Rural pathway graduates are 6 times more likely to be currently working in a rural location

30%

of graduates believe that practice culture and team is the most important factor when choosing their practice location

CULTURE

30%

FAMILY
