

# Invitation

## CV Risk Management in General Practice: Hypertension & Lipids

The management of Hypertension and Lipids are central to improving cardiac outcomes in our patients, but there are a number of myths and misconceptions about the right approach to take. How do we optimise treatment? What can I do to encourage compliance? What do the international guidelines say in 2022? and finally, What's new?

Please join us for an educational evening with Dr. Luay Samaraie and Dr. Jamie Morton as they discuss these topics in detail.

**RSVP by 29th March, 2022.**

## CV Risk Management in General Practice

**Dr. Luay Samaraie**

**MBCHB, FRACP**

Luay obtained his medical degree in Iraq, after which he moved to New Zealand to continue his post-graduate Clinical Cardiology training. He was awarded his FRACP in 2011, and he has been a consultant cardiologist for GenesisCare since 2013, recently appointed as the new CMC Chair.

Luay has a special interest in non-invasive imaging of the heart, primary prevention of heart disease and the treatment of heart failure.

Luay consults and performs non-invasive imaging investigations with GenesisCare Cardiology at the St Andrews Hospital (our CT Suite), St Andrews Medical Centre, Leabrook, Modbury, Mt Barker, Clare, and Broken Hill Clinics.

**Dr. Jamie Morton**

**MBBS, PHD, FRACP, FCSANZ**

Jamie graduated from the University of Adelaide in 2001 and was awarded his FRACP in 2010. In 2013 he was awarded his PHD on the role that high density lipoprotein cholesterol plays in cardiovascular disease, diabetes and cancer. His work on this research has been presented both nationally and internationally.

Jamie has been with GenesisCare Cardiology since 2013 and his specialised interest is in diagnostic imaging, particularly echocardiography and CT Coronary angiography, where he is the current director. He consults at St Andrews Hospital (our CT Suite), Leabrook, Mt Barker, and Murray Bridge.
