GP ADHD Shared Care

Personal Health Record Version 1, March 2023

GP ADHD Shared Care Program: A Child & Adolescent Mental Health Services (CAMHS) initiative in partnership with GP Partners Australia (GPPA)

For detailed background information, go to the Personal Health Record Background Information document at ADHD GP Shared Care | GP Partners Australia (gppaustralia.org.au)

Lifetime ADHD Care

- ADHD is a high prevalence neurodevelopmental disorder, often associated with impairment that extends • across the lifespan (1).
- vidual with ADHD and/or their carer engaged in information sharing, is the basis of good clinical care. This ensures continuity of care as patients move between age groups, health services and community services,
- ٠ follow-up according to the severity of the condition and individual factors such as co-occurring conditions, medical complications, compliance, response to treatment, social supports, and lifestyle factors. (2)
- Individualised monitoring is based on a chronic condition management model.(2) •

Routine Primary Health Care for Young People:

The Guidelines for Preventive Activities in General Practice, 9th edition, 17048-Red-Book-9th-Edition.pdf (racgp.org.au) (3) provides comprehensive advice on preventative health activities GP's routinely provide young people. Whole-person care for the young person with ADHD includes, but is not limited to:

- Sleep ٠
- Diet & nutritional screens where indicated •
- Physical activity levels & cardiovascular health •
- Smoking. Alcohol, recreational drug use, herbal and OTC preparations .
- Sexual health •
- Mental health (HEADSS assessment) •
- e-safety •
- Work
- Driving
