

Reproductive Genetic Testing with Clinpath Pathology

Katelyn Henry, *Genetics Solutions Manager*

CLINPATH
PATHOLOGY

March 2023

Our Reproductive Genetic Tests

- Non-invasive prenatal test (NIPT)
- Reproductive Carrier Screen (3 Gene)
- Expanded Carrier Screen (Beacon)

Reproductive Carrier Screening – CF, SMA, FXS

- Can be ordered on a standard Clinpath pathology form as “PRECON” or 3 gene carrier screening.

TEST SEPARATELY:

Testing of female reproductive partner followed by testing of male reproductive partner for the identified mutation only.

Cost \$385, male partner tested for free (for an identified mutation of CF or SMA).

TEST TOGETHER:

Female partner tested for CF, SMA and FXS

Male partner tested for CF and SMA.

Cost \$385 per person.

Faster TAT when tested simultaneously.

Genetic Counselling for High Risk Results

Carrier Screening (3 gene and Beacon)

Couples tested by Sonic Genetics and found to be at high risk of having an affected child will be offered genetic counselling free of charge upon referral from doctor.

Non-invasive Prenatal Testing (NIPT)

Patients that receive a high probability NIPT result are eligible for free genetic counselling upon referral from doctor.

Our Genetic Pathologists

Professor Graeme Suthers
Director of Sonic Genetics

Dr James Harraway

Dr Melanie Galea

Sundercombe

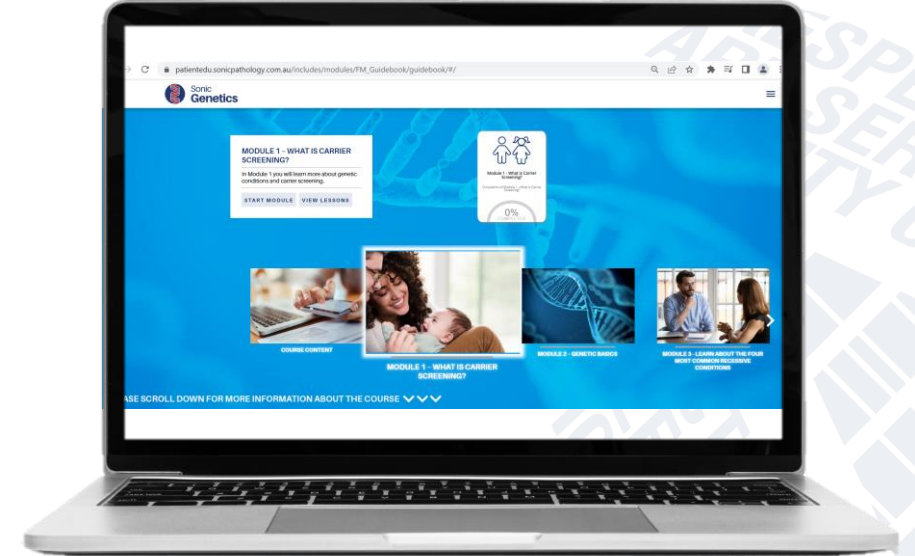

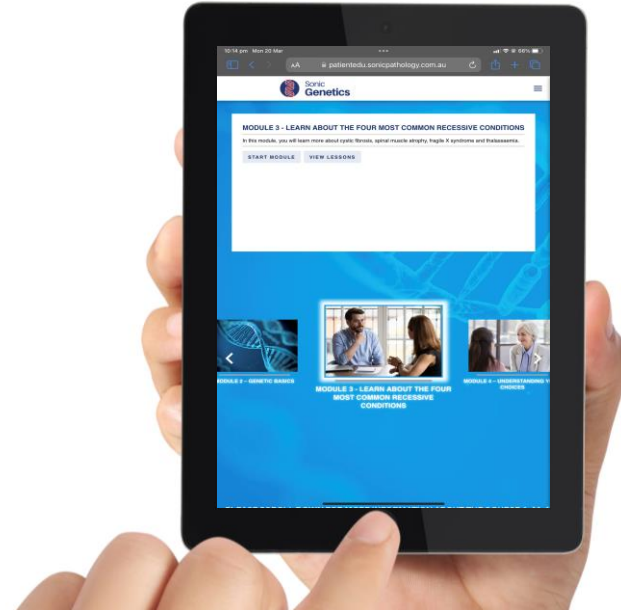

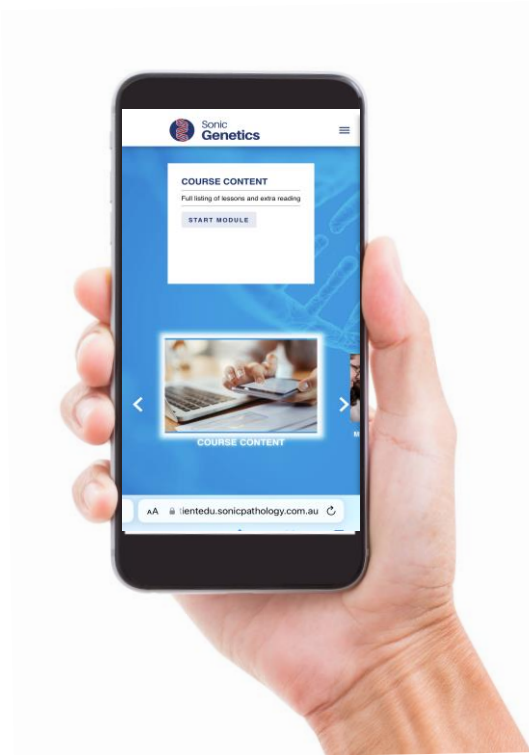

Dr Marina Berbic

Patient Education Course

Reproductive Carrier Screening

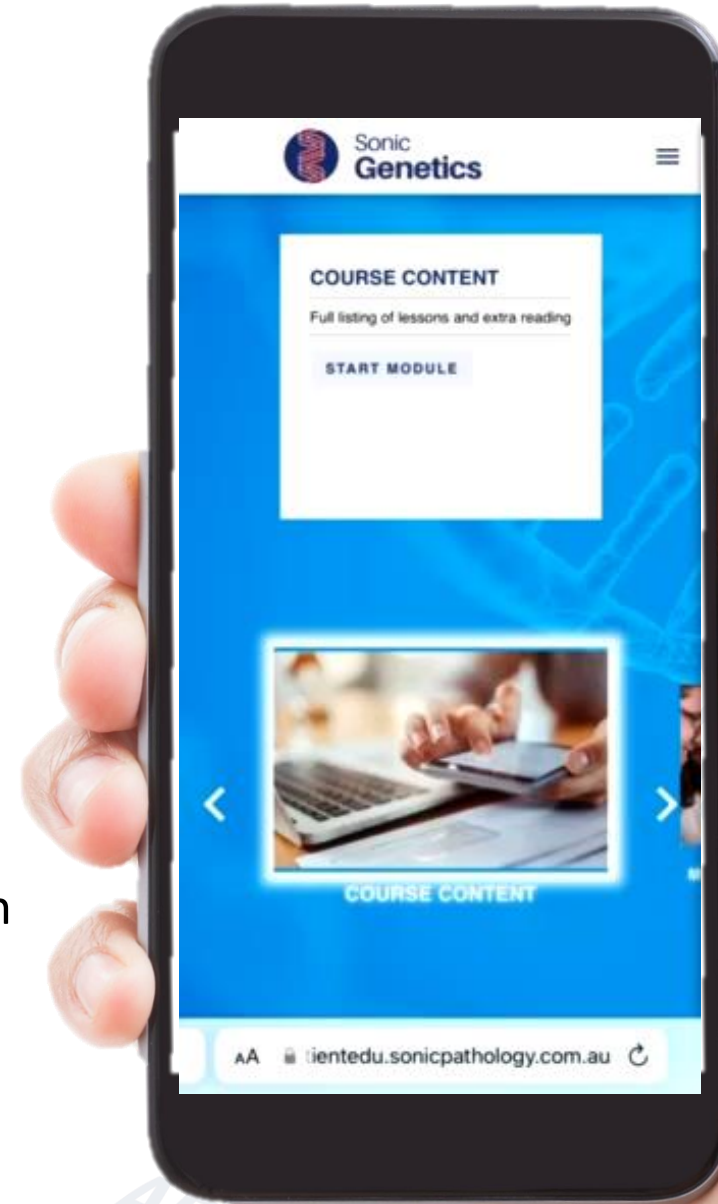

Patient Education Course

Reproductive Carrier Screening

Learn more about reproductive carrier screening, including:

- Why it is offered
- How it works
- When it is performed
- Possible outcomes
- Available options with different types of carrier screen

Patient Education Course

Reproductive Carrier Screening

The course is provided at no cost and without obligation.

It does not promote any particular type of carrier screen and patients and doctors are able to refer to the laboratory of their choice.

Patient Education Course

Reproductive Carrier Screening

How you can access this for your patients:

1. Provide email and mobile on the form in your pack.
2. A patient referral pack is then sent out once you have been set up with your unique referral code and patient information.

Reproductive Carrier Screening

You can register by emailing
khenry@clinpath.com.au

Or via the link on the Sonic
Genetics website:

The screenshot shows the Sonic Genetics website interface. The top navigation bar includes links for Clinicians, Patients, Our tests, Locations, About, Contact, and Pathologists. A breadcrumb trail indicates the path: Clinicians > Featured tests > Reproductive carrier screening > Carrier screen online course. The main content area is titled 'Carrier screen online course' and contains a list of links: 'Carrier screen online course', 'Carrier screening panel', 'Beacon expanded carrier screening', 'Order requests forms, brochures or a visit', and 'Genetic counselling'. To the right of this list is a text block describing the course and its benefits, including a 'Register now' link. A blue arrow points from the text 'Or via the link on the Sonic Genetics website:' to the 'Carrier screen online course' link in the navigation menu.
